CARBON, ALBERTA, THURSDAY, SEPTEMBER 10, 1931

\$2.00 A YEAR IN ADVANCE

CARBON VILLAGE TO HOLD TAX SALE

In this issue appears a list of property in the Village of Carbon that is being advertised for sale on account of tax delinquency. The tax sale is to be held on October 6th at the office of the secretary-treasurer, Alex Reid, and anyone desiring to hold their property that is listed in this sale, can do so by paying the back taxes and the penalty, otherwise said property must be offered for sale according to the terms of the Village Act.

The tax arrears have been gaining great proportion this past few years in the Village of Carbon and all persons who owe back taxes should endeavor to pay them before another year rolls around. When property is listed in a tax sale there is considerable expense attached and the property owner must assume this added expense to redeem his property.

TENNIS NOTES

Carbon Juniors Defeat Three Hills

A match was played at Carbon on Wednesday September 2nd between the junior teams of the Carbon and Three Hills Lawn Tennis Clubs. Six events were contested, and the result was a win for the Carbon boys in every event. Carbon Juniors have had a very successful season; out of eight inter-town matches they have played, they have won seven and drawn one, and of sixty-two events contested, they have won forty-seven and lost only fifteen.

The following are the results and the scores of last Wednesday's games:

Boy's Singles

W. Poxon of Carbon defeated Hollonquist of Three Hills, 6-4, 5-6, 6-4. J. Fairbairn of Carbon defeated Kalbfleisch of Three Hills 6-2, 6-0.

C. Poxon of Carbon defeated Murray of Three Hills 6-0, 6-3.

N. Nash of Carbon defeated Robertson of Three Hills, 6-1, 6-3.

Boy's Doubles

W. Poxon and J. Fairbairn of Carbon defeated Hollonquist and Kalbfleisch of Three Hills, 6-1, 6-0.

C. Poxon and N. Nash of Carbon defeated Murray and Robertson of Three Hills 6-5, 6-3.

SLOW DRIVERS CAUSE TROUBLE

This country and the United States are recommending the making of slow driving an offence under the law where conditions make it dangerous. So far as some of the provinces of Canada are concerned the police already take action in aggravating cases, basing their activity on legislation now existing. There was a recent case at Mimico, Ontario where a driver was fined for proceeding at 17 miles an hour and the magistrate remarked: "You are causing unnecessary trouble for everybody else when you drive at that rate."

WILL OBSERVE THANKSGIVING DAY ON OCTOBER 12

Thanksgiving Day will be celebrated this year on October 12. Official announcement of the passing of the order-in-council to this effect was made Saturday morning. The necessary proclamation will be issued shortly.

Fixing a date by order-in-council for the observance of Thanksgiving Day separate from Armistice Day—or what is now known as Remembrance Day under a bill passed at the last session of Parliament—is a departure from the former practice. While Remembrance Day will be commemorated each year on November 11, the separate date for observance of Thanksgiving Day will be fixed each year by order-in-council.

10th Government Crop Report

Wheat cutting is 90 per cent completed in the southern part of the province and in the Peace River district. In Central and Northern Alberta where continued rains have delayed ripening and harvesting, not more than 50 per cent of cutting has been done. Threshing is well advanced in the south. In the area lying south of Calgary and West of Lethbridge many summerfallow are yielding from 25 to 30 bushels per acre of high grade wheat. Yields from spring-cultivated lands are light. Threshing is in progress in the Peace River district. The yields are satisfactory but quality has suffered from heat and drought during the ripening period. Very little frost damage is reported.

Oats and barley have ripened rapidly in the past ten days and a considerable acreage has been cut. Yields of coarse grains will be satisfactory in all parts of the province with the exception of the East Central and the South-eastern areas.

An excellent second cutting of Alfalfa has been harvested in the irrigated districts. Sugar beets are progressing favorably although yields will be slightly below those of last year.

Alfalfa and Sweet Clover seed crops give evidence of heavy yields. Potato and root crops are in satisfactory condition.

40 MARRIED MEN REFUSE WORK AT \$45 A MONTH WITH BOARD

Definite policy of dealing with unemployed men and women who refuse to accept work offered to them should be formulated immediately, according to a recommendation received by commissioner David Mitchell of Edmonton last Friday from Thomas Magee, city relief officer.

Mr. Magee reported what the commissioners considered a "staggering" incident on Friday. He said that his department had a job for a married man on a farm at \$45 per month and board. During the day 40 married men called at the relief office; each was offered the job in turn and everyone refused it.

ALBERTA NEWS

It seems that the Carbon M.D. is not the only one out after more money for relief purposes. Recently the M.D. of Grasswood asked the Provincial Government for \$25,000 for relief, instead of the \$2,500, the sum originally allotted to the municipality.

As a result of the "Gopher Tail" contest sponsored by Odell's Ltd., and which closed August 31st, more than 15,000 gophers have been annihilated in the surrounding district by boys and girls who entered the competition.

—Hanna Herald

A call to all coal operators of the Drumheller Valley to make careful selection of men whom they employ and to discharge all who are known to participate in Communist activities has been sent out in the form of a resolution by the Red Deer Valley Unit No. 90 of the Army and Navy Veterans in Canada.

An engineering survey of Youngstown district is to be made as a result of the government's proposed scheme of water conservation through the construction of a series of reservoirs by the building of dams across creeks and coulees in that area.

A petition is being circulated in Macleod requesting the provincial government to take steps to compel all irrigation systems of the Province to observe the existing regulations by providing screens and fish ladders at the intake of the irrigation canals.

Arrowood has a paper—Bow Valley Resource—the first number of which was issued August 20, which purposes to serve the whole area, which includes Milo, Queenstown, Shoultice and Mossleigh. It is a 5-column, 4-page paper all home print and Norman G. Cary is the editor and publisher.

Lawrence Drebert, of Edmonton, was Monday declared grand champion of the second national model aircraft contest at Ottawa. Drebert's machine stayed in the air 281 1-5 seconds.

The dry squad of the Alberta Liquor Act is to be discontinued, according to J. F. Lymburn, attorney-general, and the enforcement of the act will be placed in the hands of the Alberta Provincial Police. The change is to take place immediately.

Amendment has been made by Provincial order-in-council, to the regulation governing round-ups, the Alberta Gazette states, announcing that the minister shall appoint a manager of each round-up, "who shall be agent and act on behalf of the persons in charge, and who shall be the person named in the petition, or some fit and proper person chosen by the Minister."

In the early hours of Friday morning the general store of the Rockyford Trading Company was broken into, the thieves gaining entrance through the trap door leading to the basement, which was padlocked, and through another door which was bolted on the inside, the marauders using a jimmy to open this door. A number of articles were taken, also \$10 in silver.

Good progress has been made with the preliminaries to the building of a new gravelled highway, Belseker to Delburne, as a relief measure. The municipalities concerned will pay 30 per cent of the cost, the Provincial and Dominion governments paying the balance. It is expected that the grading will be completed this fall and the gravel laid after freeze-up.

Wheat cutting is more than 40 per cent completed in the Bassano district. An excellent grade is being delivered to the elevators, practically all of it being No. 1 northern. Yields, however, are running low. The best heard to date is 11 bushels per acre and the estimated average for the district will be about 4 bushels to the acre.

MOST OF CUTTING COMMENCED

Most of the farmers in the Carbon district have now commenced the cutting of their wheat and contrary to expectations, the crops as a whole are better than was at first expected. It will be some time before threshing is in full swing, owing to the damp weather this week, but the grade of wheat should be pretty good, with most of it going No. 1 or No. 2. There are also some late crops in the district that will yield and grade well if frost holds off a little longer.

No new wheat has been reported to have been hauled to the local elevators so far this year.

French Wheat Price \$1.82

PARIS, Sept. 7.—The Tradieu plan of revalorization of wheat and other French farm products reached its climax today when wheat reached 162 francs a quintal, or approximately a dollar and eighty-two cents a bushel.

The rise was achieved despite an abundant harvest throughout the country.

The French farmers are obtaining more than three times as much for their wheat as are United States and Canadian growers.

Before the Tradieu plan became effective, French farmers were threatening to discontinue planting although the French crop has never been sufficient to meet consumption. In last year between two harvests the price has been increased about 33 per cent, from 105 francs to 162 francs a quintal, equivalent to an increase from \$1.02 to \$1.82 a bushel.

The Tradieu plan was based on three principal points.

1. The limitation by government decree of the proportion of foreign wheat incorporated in French flour.

2. The limitation of wheat imported to the exact needs of millers, regulated by import licenses.

3. Creation of easier credits, banks agreeing to accept wheat growers promissory notes readily as those of industries and business.

A heavy import duty has already been in effect, varying according to the schedules but reaching about 80 per cent. It was sufficient to make the import of American and continental wheat unprofitable. Russia's great exports were curbed by the export license plan.

"The salvation of French agriculture was the elimination of monoculture," Tradieu said. Wheat is now grown alongside of vines where once grapes were the only harvest; sugar beets grow alongside pastures in the dairy country. With five big crops easy to grow or raise anywhere in France, wheat, wine, dairy produce, sugar beets and cattle—there should never be any return to monoculture, which has proven bad business tactics."

Southern News

Mr. and Mrs. Christ Bertsch Jr., and children spent the week end with Mrs. Bertsch's parents in Calgary.

Born, to Mr. and Mrs. H. G. Kary,

SCHOOL FAIR IS BEING HELD TODAY

The Carbon school fair is being held today and it is expected that the exhibits will be better as a whole than last year. Parents of the school children and all others are asked to make every effort to see the exhibits at the curling rink this afternoon and in this way show their appreciation of the work that our school boys and girls are doing.

TENNIS PLAYERS AT DRUMH'ER

Carbon was represented at the Open Tennis tournament at Drumheller on September 6th and 7th by the following players: L. Poxon, C. Poxon, W. Edwards, J. Fairbairn and W. Poxon. All made excellent showing in view of the fact that there were entries from Calgary and other large centres. J. Fairbairn defeated J. Desecuw, Drumheller, in the District Singles, and in the next round met E. Melville, Drumheller and after taking the first set and looking like a winner, finally was eliminated after a hard struggle. In the open singles Fairbairn defeated J. Taylor of Acme in the first round, Barlow of Drumheller in the second round, and then lost in the third round to Guy Morton of Calgary.

In the District Singles, W. Edwards defeated G. Mason of Drumheller in the first round, J. Knox of Hesketh by default, in the second round, Maynard, of Drumheller, and in the third round he lost in the semi-finals to Melville, of Drumheller.

C. Poxon had the ill luck to draw Stan Hayden (Junior Champion of Alberta) in the Open Singles and Shand of Hanna in the District Singles, but made a good showing against these more experienced players.

J. Fairbairn and W. Poxon defeated a Drumheller team in the first round of the Open Singles, and then lost in the next round to Stan Hayden and G. Morton of Calgary. Fairbairn and W. Poxon won from Brown and Holladay, Drumheller, in the first round of the District Doubles and have to go back to Drumheller to play the next round, probably on the 13th.

L. Poxon and W. Edwards met Hinks and Hinks of Calgary in the Open Doubles, and made a good showing, as the Carbon pair were leading three games to love in the second set, but finally lost to the Calgary team, who are now in the finals.

W. Poxon drew Hinks of Calgary in the Open Singles, and in the District Singles he had a long match with A. Sanaster of Rockyford, finally losing after taking the second set 6-3.

The results were very encouraging to the Carbon Juniors and it showed that they can now more than hold their own with senior players from other towns, and that it usually takes a player from the larger cities to eliminate them from the tournaments.

on Friday, September 4th, a daughter.

Mr. J. M. Ohlhauser has left the George Marshman place and is now working at the Black Diamond mine.

The first threshing has been done this year on the farm of Christ Bertsch Jr. On the six acres of stubble, barley yielded 25 bushels to the acre.

Shooting Season Opens Sept. 15

WE CARRY A FULL STOCK OF HUNTING SUPPLIES

GUNS — RIFLES — AMMUNITION — CLEANING RODS, ETC.

SHOT GUN SHELLS—Buy them here. We have shells in all sizes for 10-12-16 and 20 gauge guns. Be prepared for the opening of the season on September 15th.

ORDERS TAKEN FOR ANY GUN PARTS

Thermos Bottles, Lunch Kits, Water Bags, Flash Lights, Duck Calls

HEATERS

Home-Taught Fears

What has been described by one writer as "far and away the most conclusive tests of character ever made, since Adam and Eve reared Cain and Abel and made a moral success of one boy and a moral failure of the other," were the elaborate studies recently undertaken by two professors of Columbia and Yale Universities. These scientists tested the character attitudes of over 10,000 school children from eight to sixteen years old, under "normal" school and home conditions. The children did not even know they were being scientifically studied. The net result of these intricate and reliable tests was to show that among agencies in having the greatest influence in building human character, the "home" outweighed the school, the church, the Sunday School, the movies and sports all combined.

This is fact number one for parents to consider. The second in importance is where and how home influence and training makes or mars the child life within its walls. There are three phases of home life out of which are developed the emotional patterns or habits which will make boys and girls into self-reliant men and women, able to meet an imperfect world with high ideals of their own. These phases are, first, the attitude between husband and wife; second, the attitude of sisters and brothers toward each other; and third, the attitude of parents toward children.

Let us take a look at the way in which these home attitudes foster the one emotional attitude which affects our lives more than any other and extends as a sort of background through nearly all the others. This is self-confidence as opposed to fear—not fear of some special thing but a rather generalized fear of life itself.

Vast numbers of people who will face death on a moment's notice, who go through all sorts of real dangers without a quaver, have yet a sort of underlying fear of life's possibilities that seldom leaves them. It is easy to fall into these generalized fears, and there are thousands of ways in which parents actually teach this state of mind to their children. One of the amazing discoveries made by doctors during the examinations in the World War was, that so many perfectly healthy young men had all their lives been convinced that they had heart or kidney trouble or some similar malady and had feared to undertake arduous occupation for that reason. In nearly all cases their fears had been started by hearing symptoms discussed at home.

What is "fear" anyhow? Well, the scientists have done a world of work in the last thirty years on fear, and they find there are three distinct kinds. The first is natural or biological fear—the kind that preserves you from natural perils; the second is intelligent or constructive fear—the kind you get from sound, healthful education; and the third is pathological fear—destructive fear that comes from a wrong view of life, from wrong comparisons of yourself with other people, from wrong attitudes toward your job, and from telling yourself constantly you are not as important as others. As a rule there are just three people who ever tell you you are no good—your parents, your brothers or sisters, and yourself. And nine times out of ten you have begun to tell yourself you are no good because your mother, or father, or brother, or sister, in some way first destroyed your self-confidence.

For example, you hear many people assert they are naturally afraid of lightning, or burglars, or something of the sort. This is not true, because there are but two things that people are "naturally afraid of." The first is a loud noise, and the second is the sense of falling. Dr. John Watson and his students have tried in hundreds of ways to frighten babies, but these are the only two ways in which they have succeeded.

Many mothers say, "My child has always been afraid of the dark." Oh, no, the mother taught it to be afraid. She put the babe to bed and went out and slammed the door, or talked loudly, or scolded, or dropped a basin on the floor. Or, when it got a little older, the mother talked about being afraid of the dark herself, or told the child something dreadful that was likely to happen in the dark.

And it is just this way that children are taught to be afraid of life. Parents need to be taught on the many ways in which they actually teach their children to be afraid of life by shielding them from responsibility. They are missing the greatest educational opportunity this world offers when they fail to put as much responsibility on the child as he can reasonably carry just as early in life as is possible. In this way you build up habits of success instead of habits of failure, courage habits instead of habits of fearing life and dodging its responsibilities.

This has nothing contrary to the duty of teaching the children the second kind of fear—intelligent fear—which is merely teaching them good judgment in avoiding dangers and destructive habits. This kind of fear is merely the negative side of character building and should be carried through to the constructive or positive side—that is, to the development of ideals and ambitions, of goals to be reached and battles to be won. The greatest duty of parents is to fill their children's minds with the belief that they can meet these duties and battles with satisfaction and success.

When intelligent fear is carried to the point of exaggeration it becomes the third fear—diseased or pathological fear. The way out is to develop logical judgment of our own powers and those of our friends. When this is done honestly, when you think "in detail" of your own powers of body and mind and compare them with these same qualities in others, you will be astonished to find that you are superior in most respects to the very people you have taught yourself to be afraid of.

But the great lesson for parents is, that all these attitudes, both destructive and constructive, are chiefly developed in the home. And since Nature has given us but two inborn fears, and all others are learned, and since the home is the greatest agency in the world for teaching all our emotional attitudes, the very large question every family should answer is, "Are we as parents or brothers and sisters teaching ourselves and one another to meet life with fear, self-depreciation and doubt, or are we trying to be a daily inspiration to one another to meet life with the self-confidence and good cheer that calls out each one's best energies?"

The answer to these questions will have more effect on the happiness and success of every member of the family than anything that ever has been or ever will be taught in school or college.

Could Not Check the Summer Complaint A Few Doses Did It

Mrs. R. Coulter, 918-11th Ave. E., Calgary, Alta., writes:—"Last summer my youngest son was very bad with summer complaint, and everything he ate he would vomit, and he got so thin I became very much worried. I could not get the discharges checked, so I went to the druggist and he gave me a bottle of Dr. Fowler's Extract of Wild Strawberry and told me it would stop the trouble if anything would. After I had given the boy the first few doses I noticed the discharges were being checked, and it was not long before he was well again."

Air Mail Service To Aklavik Necessary

Paying Its Way and Must Not Be Abandoned

Whatever happens to the prairie mail that to Aklavik simply must not be abandoned. It was stated by Mr. Veniot, former postmaster-general that under the old system of delivering mail by dog teams in winter and by boat in summer, it took many weeks to reach its destination and even then the service cost the department \$41,000 a year. Contracts for delivery by airplane called for only some \$6,000 additional and instead of giving people of the far north mail once or twice a year they have been receiving several deliveries each winter. It was further stated that the northern air service under a two-cent rate today is paying its way and has a surplus. These facts should remove the Aklavik service from any general plan of cutting out the air mails.—Edmonton Journal.

ACIDITY FOR 10 YEARS

Before he Found the Remedy

Many people endure suffering unnecessarily. This man did. If he had known ten years ago what he knows to-day, he would have been spared a great deal of suffering.

"I feel I must write a few lines in appreciation of your Kruschen Salts. I have suffered for 10 years from chronic acidity of the stomach. I tried nearly everything, until I was advised by a friend to try Kruschen, which I have taken for the last two months, and I am pleased to say I have had no return of the acidity."—W. B.

Kruschen Salts swiftly neutralises acid, takes all the ferment out of it, and gently expels it from the system. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent this harmful acid from ever accumulating again. After that you'll experience no more misery after meals. Kruschen will keep your inside clean and serene. Pure and invigorated blood will be sent coursing to every part of your body. You'll feel wonderfully energetic and well. As healthy and hearty as it is humanly possible to feel.

A Matter Of Taste

Canadian ice-cream is delicious but Canadian coffee "almost undrinkable," in the opinion of a group of British cadets who have been attending rifle meets in this country. The cadets said they liked Canada "immensely" and that everyone would endeavour to come back.

Externally Or Internally, It Is Good.—When applied externally by brisk rubbing, Dr. Thomas' Eclectric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Butter Production

Butter production in Western Canada last year increased by 1,161,424 pounds; the total output being 47,424,201 pounds.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surface. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

The only humming bird found in the eastern United States is the ruby-throat.

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

Four To a Man

Policeman: "I have found a case containing whisky."

Prohibition Officer: "Good, I will send a dozen customs officers to deal with it."

Policeman: "I think six men will be enough—there are only two dozen bottles in the case."

The deepest safe diving limit for any submarine yet constructed is 450 feet.

W. N. U. 1906

Nations Will Uphold Britain

Prestige Must Be Safeguarded Or World Will Suffer

Engrossed as we are in our own troubles in Canada, we may not realize how very serious is the situation in the Mother Country. Yet the outward signs, visible to the world, are sufficiently alarming. We may be sure, when a Labour Prime Minister must not only interrupt his own holiday but feels it necessary to call into council the leaders of the Conservative and Liberal Parties to devise emergency measures to meet an imminent crisis, that the crisis is grave and, indeed, almost desperate.

British stability is a world asset. If anything serious were to happen to the age-long leader of world finance and trade, the whole world would suffer. It is inconceivable under such circumstances that the prestige of British institutions will not be safeguarded by all the power which the leaders of finance in other nations can bring to bear. Some of them may not relish the opportunity to rush to the rescue of the Colossus of other years—but they will rush. They dare not permit anything really dangerous to occur.—Montreal Star.

Scientists Sample Arctic Sea Bottom

Interesting Report Received By Radiogram From Submarine "Nautilus"

A copyrighted radiogram from the submarine "Nautilus" to the New York American tells how scientists aboard the vessel have sampled the bottom of the Arctic Ocean 5,220 feet from the surface.

The result, says the radiogram from Capt. Sir Hubert Wilkins, commander of the North Pole submarine expedition, was a column of Arctic mud 17 inches long and one inch thick. It was "brown from the surface for 15 inches and then pale blue, representing the deposits in polar waters of hundreds of thousands or perhaps hundreds of millions of years.

Saskatoon Fair

Operating Loss This Year Shows Decrease Over That Of 1930

Operating loss on the 1931 Saskatoon Exhibition, including all fixed charges against the exhibition board, amounted to \$18,848.43, it was announced at a meeting of the finance committee. This shows a substantial decrease over the exhibition loss in 1930.

Total attendance was 66,853, with 39,786 attending the grandstand.

In view of conditions this operating loss was considered very reasonable and the exhibition management has operated about \$5,000 under the amount budgeted in 1930.

Ontario Mines

Output Shows Decrease In First Six Months Of Year

The value of Ontario mineral output for the first six months of 1931 shows a 12.04 per cent. decrease over the same period last year, the half-yearly report of the Provincial Department of Mines shows. At the same time, gold production of the province reached the record total of \$20,608,196.

Production to the end of June this year amounted to \$50,997,740, as compared with \$58,236,562 for the corresponding period of 1930.

Gulf Stream Is Extending And Cold Arctic Waters Receding Much Farther North

Discovery that the Gulf Stream has increased in extent to an unusual degree this year has been made by investigators on the United States patrol boat "General Green," which has been engaged for four months in exploration work in northern waters.

The explorers, including Commander Ricketts and Mr. Olaf Mosby, formerly associated with Dr. Fridtjof Nansen in oceanographic work in Norway, further discovered that, owing to the exceptionally high temperatures, the cold arctic waters had receded much farther north. Remarkably few icebergs were seen. Encroachment of the Gulf Stream upon the western slope of the Newfoundland banks was found between the forty-first and forty-second parallels to longitude 46 west, then turning sharply north and making another encroachment toward the eastern slope. Temperature at one point in the area was 20 degrees higher than last year.

The "General Green" expedition started north in July to study ocean currents, salinity, temperatures at various depths and the ice drift between Newfoundland banks and waters as far north as Hudson Strait. Records of temperatures and salinity at various depths were taken at 122 stations and 2,000 soundings made in many areas between Labrador and Greenland never previously surveyed. No field of ice was encountered on the Labrador Coast, and only 90 icebergs were found in Hudson Strait.

Two hundred icebergs were sighted on the Greenland Coast while anchored against the Ivagatut Glacier. Three members of the Courtauld expedition, surveying the Greenland ice cap, arrived on board. They were Mr. James M. Scott, Mr. Andrew Stephenson, and Lieut. Martin Lindsay. All had travelled 400 miles afoot over the ice caps. They had made exceptional time and were in excellent condition. Commander Ricketts, beyond stating that fine weather had been encountered, that the crew had enjoyed the best of health, and that the programme had been completed, was reticent regarding details of work as first reports must be made to headquarters.

A Great Benefactor

**Pullman, Inventor Of Sleeping Cars,
Born a Hundred Years Ago**

One hundred years ago a man named Pullman was born. When he died he left a great fortune and a name that was sure to last. It was Pullman who conceived the idea that something more comfortable than the old compartment carriage might run upon railways. His first cars, with gangways from end to end and provided with comfortable seats and tables for passengers, made their appearance in America between sixty and seventy years ago. They were an immediate success, and in 1874 the Midland Railway Company imported four of them to Great Britain. They were sent over in parts and put together on arrival. Pullmans are now seen on nearly all the railways in the world.

Priceless Furs From North

Nearly half a million dollars' worth of fur gathered from the sub-Arctic barren lands, passed through The Pas, Manitoba, recently, en route to Winnipeg and London, England. The shipment, 75 bales in all, was composed of priceless pelts, silver fox, white fox and a few choice beaver skins.

"Why don't you stop applauding? The singer's going to sing again."
"Well, as long as I applaud she can't start singing again."—Lustige Kölner Zeitung, Cologne.

Five Billions In Gold

**Gold Holdings In United States Will
Soon Be Greatest Ever**

The pockets of Uncle Sam soon will bulge with more than \$5,000,000,000 in gold.

A survey of the gold situation showed that it will be only a matter of a short time before gold holdings in the United States will top the five billion mark for the first time in the history of any nation.

The gold reserve on August 26 amounted to \$4,992,000,000, while impending shipments from South America will increase this amount.

A shipment of \$4,255,000 is being sent to New York from Argentina on the steamer "Western Prince," and Uruguay plans to send \$5,000,000. In addition, receipts of \$965,000 from Mexico was reported by the Federal Reserve Bank of New York.

THE JACKET DRESS PROVES ITSELF

The jacket suit of plain or printed flat crepe or light weight woollen holds a prominent place in the new mode.

No wonder for its popularity. It is so thoroughly comfortable, chic and practical.

The simulated tuck-in blouse is youthful in this crepe woollen suit with crepe silk blouse. The scalloped collar and jabot frill are softly flattering. The hips of the comfortably full flaring skirt are snugly fitted with a shaped yoke.

Style No. 623 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The 36-inch size requires 4 1/2 yards of 39-inch material with 1 1/2 yards of 39-inch contrasting. Red and white printed crepe silk with white crepe blouse is refreshingly youthful.

Light navy blue flat crepe with white is exceedingly smart. Tweed mixtures, jersey, shantung and linen also suitable.

Price of pattern 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

IN ROYAL TIFF

Domestic affairs of members of the Roumanian royal family are again in the limelight with Queen Mariana of Yugoslavia (above) reported to have refused to participate in the celebration of the tenth anniversary of her husband's accession to the throne. And all because of a family tiff. Hubby is King Alexander of Yugoslavia while brother is King Carol of Roumania.

Canada Selling Wheat

**Increased Sales Are Noted Over
Previous Year**

Although unable to exercise any control over world prices of wheat, Canadian wheat holders last year sold 72,370,675 bushels of wheat more than they sold in 1929-30. They sold this in face of rigorous competition from Russia and Argentina, and in face of several adverse factors. One bushel out of every three shipped in the world in the 12 months ending July 31, 1931, was Canadian.

Despite stiff competition from Russia and the Argentine in the European market and with the Oriental market captured largely by Australia through depreciated currency, Canada last year exported 228,480,403 bushels of wheat and 6,701,663 barrels of flour. This was the equivalent of 258,637,887 bushels, actually exported, an increase of 72,370,675 bushels over the 1929-30 crop year.—Regina Daily Star.

Maple Sugar Production

Maple sugar and maple syrup produced in Canada in the spring of 1931 had an estimated value of \$3,537,700, of which the former accounted for \$930,800 and the latter \$2,606,900. There were 5,484,100 pounds of maple sugar produced and 1,314,700 gallons of maple syrup, the Province of Quebec leading by a wide margin and followed by Ontario.

Cow Wins Honours

Aberdeen Angus Cow Owned In Saskatchewan Carries Off Prizes

"Lola of Moose Jaw," the Aberdeen Angus cow owned by W. J. F. Warren, of Belbeck, Sask., has added another string of honours to its already long list, by carrying away the premier award of the Aberdeen Angus Association of Scotland, both at Saskatoon and at Moose Jaw as well as winning the highest honours at Weyburn, Estevan, Portage la Prairie, Dauphin, Yorkton and Melfort. Mr. Warren had a very successful season this year, particularly at Regina where his herd won nine first prizes, four seconds, two thirds, one fifth and two sixths.

Easily Identified

The lady was quite flattered by the little boy's recognition.

"Do you know all of your mother's friends?" she asked.

"No, ma'am," replied the lad, "but I can tell you by your feet."

POLO PLAYER RESCUES KING'S COUSIN

Lady Louis Mountbatten (above), wife of a cousin of King George, and one of the richest women in the world, was rescued from drowning off Cape Antibes, France, by Stephen Sanford (insert), star American polo player, when she was seized by cramps. Brought ashore in a state of collapse, Lady Mountbatten was not revived for some time.

Tramp Steamers Of Late Years Have Been Forced To Give Way To Competition Of Ocean Liners

Advance In Public Health

**Mortality Amongst Younger People
Is Still High, Says British
Medical Officer**

Although great advance had been made in public health this century it was not possible to be satisfied with the position of the general health today, Dr. W. G. Willoughby, medical officer for Eastbourne, said in his address as president of the British Medical Association, at the recent meeting in Eastbourne. He said that the increase in the average duration of life in the present century, averaging more than 12 years, was mainly owing to the decrease in infant mortality, but was partly due to the general lowering of death rates at other ages. Ten per cent. more of the population now reached the age of 50.

"There were far too many deaths at early ages," Dr. Willoughby said. In the registrar-general's latest summary, that for 1929, it was shown that rather over one-third of the deaths of males and nearly one-third of the deaths of females, occurred before the age of 50. Omitting deaths of infants—deaths in the first year of life—there were 40,656 deaths of children under 15 and another 20,663 in the next 10 years of life.

Although the vitality of the nation has been steadily improving, the expectation of life is still only 55 years for males and 59 for females. This was one of the points emphasized by Dr. Willoughby.

The tramp steamer which used to ply to the strange ports of the world seeking cargoes probably soon will join the sailing vessel in near-extinction.

A calculation made in London shows that liners, both passenger and cargo, running on regular routes and time, as contrasted with the tramp, comprise about 70 per cent. of the world's tonnage. Liners totalled but 36 per cent. of the world's tonnage in 1913.

The change has been particularly noticeable in the port of London, where, outside the timber trade, there now are very few tramps as compared with pre-war days. Nearly everybody prefers to send goods in "parcels" up to 10,000 tons or more on one of the regular line ships.

Canadian grain for instance, used to cross the Atlantic and Pacific in tramp steamers. Now a large part of it comes across the oceans in the Canadian Pacific's fast cargo liners or in the holds of passenger ships. There are half a dozen regular lines on the north Pacific, formerly a tramp area, and even the River Plate ports are now on the schedules of the liners.

Sea affairs in general have been changed considerably by the shift from tramp steamer to liner. The seaman no longer signs on for a voyage "not exceeding two years," but can tell his wife almost to the day when he will return. Jobs are steadier, for cargo liners stick to their schedule.

But with the passing of the tramp steamer passes some of the last vestiges of the pioneering of another day, and one of the last links between the ship owner and the merchant adventurers of the seventeenth century is broken.

Good Market For

Saskatchewan Cattle

Stock Raisers Have Splendid Opportunity For Export To Britain

During the twelve month period ending August 20th, Saskatchewan exported seven hundred and eighty-nine head of beef cattle to Great Britain. These figures have been compiled by W. Waldron, Provincial Markets Commissioner, from weekly returns on the export cattle trade furnished by the Dominion Live Stock Branch, Ottawa.

According to Mr. Waldron, Saskatchewan farmers are not making the most of their opportunity to secure a much larger share of the business. "While it must be admitted," states Mr. Waldron, "that some of our stockers and feeders find their way to Manitoba and Ontario, there to be finished and exported, never shall we have a better opportunity to enter the export cattle trade than offers at present through the wholes of northern Saskatchewan with an abundance of excellent feed, water, and cheap grain, provided cattle put on feed are of the right quality."

The following figures show where the cattle exported during the year originated: Ontario, 9,176; Alberta, 5,484; Manitoba, 1,477; Saskatchewan, 789; Quebec, 296, a total of 17,222.

A final point mentioned by Mr. Waldron was that he thought there existed a need for the organization of a greater number of local co-operative shipping points in order that a farmer having two or three head of steers of export quality would be able to ship with his neighbor and not sacrifice a first class animal at a second class price.

"You're not touching my papers are you, Jack?"

"I'm cutting out paper dolls, Dad but I'm only using the writer sheets."—Kasper, Stockholm.

Brown: "Do you know, I'm losing my memory. It's worrying me to death."
Jones (sympathetically): "Never mind, old man. Forget all about it."—The London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

Fraulein Marga von Etsdorf, German air woman, landed at Haneda aerodrome, Tokio, to complete a solo flight from Berlin in 12 days.

An order for approximately 750 cars of this year's British Columbia pilchard oil has been placed with three firms in British Columbia by Messrs. Proctor and Gamble of Ivorydale, Ohio.

Since the opening of the Panama Canal in August, 1914, tolls collected have totalled more than \$250,000,000, and the cargo passed through the canal aggregated 300,000,000 tons.

Sir Hall Caine, noted British novelist, died, August 31, at Greba Castle, his home in Douglas, Isle of Man, where he had been seriously ill for some time. He was suffering from a heart ailment. He was 78 years old.

Total amount invested by Canada in all canal systems throughout the Dominion is \$233,608,586, Hon. R. J. Manion, Minister of Railways, stated in the House of Commons. Annual revenue from these systems is \$536,727.

The title of Celery King of the United States and Canada has been awarded to James Little, St. Catharines, Ontario, district farmer. According to word received from Cincinnati, Ohio, where an international fair was held.

"SUFFERED EVERY MONTH"

"WHEN I was twelve years old my mother wanted me to take Lydia E. Pinkham's Vegetable Compound, but I wouldn't. If I had I might have been a well girl now. I have suffered terribly every month."

"The girls where I work used the Vegetable Compound and urged me to try it. It helped my nerves. I intend to keep on until I am well and strong." Miss Rose Lama, 6 Brighton Avenue, Toronto, Ontario.

MISSIONARY EXPERIENCES

Golden Text: "Blessed are they that have been persecuted for righteousness sake; for theirs is the kingdom of heaven."—Matthew 5.10.
Lesson: Acts 14; Ephesians 6.10-20.
Devotional Reading: Isaiah 50.4-9.

Explanations and Comments

Paul Cures a Cripple At Lystra, verses 8.11.—There is no mention of a synagogue here at Lystra; probably there was none, the Jews not being very numerous. Seeking a place of public resort where they might preach, Paul and Barnabas probably chose the marketplace. Here was a cripple, who, in all likelihood, was brought each day by his friends and left at the same place to beg, just as the lame man cured by Peter was left at the Gate Beautiful, Acts 3.2. Professor Ramsay notes the marked emphasis put upon this man's physical incapacity—"impotent in his feet," "a cripple from his mother's womb," "who never had walked," the three phrases which, like the beats of a hammer, compel the reader's attention.

This cripple heard Paul speak. The tense of the verb in Greek suggests repeatedly; on several occasions Paul had preached and the cripple near by had listened and had come to accept the truth. It may be that Paul told how Christ had performed many wonderful cures in other places, and the hope thus aroused in the cripple's heart began to manifest itself in his face so that Paul, fastening his eyes upon him and seeing that he had faith to be made whole, stopped his sermon, to say, with a loud voice, "Stand upright on thy feet." The cripple leaped up and walked.

Hailed As God, verses 11-13.—This miracle of healing electrified the whole city. Some one raised the cry, "The gods are come down to us in the likeness of men," and it was taken up by the crowd, and repeated in their native dialect, the speech of Lycaonia. And they called Paul "Mercury," and, probably because of his more commanding presence, they called Barnabas "Jupiter."

The Multitude Restrained From Their Purpose, verses 14-18.—It may have been the singing of the worshippers gathering before their abode that brought Paul and Barnabas forth. As soon as they became aware of the purpose of the crowd, "horror-stricken, and with garments rent to show by sign as well as by words their repudiation of such worship, they sprang into the midst of the crowd that they might put an end to the delusion of the people."

"Men!" they now cried (as Moffatt's translation forcibly expresses it), "what is this you are doing? We are but human—with natures like your own. The gospel which we are preaching to you is to turn from such futile ways, to the living God!" Then Paul preached his first recorded sermon to pagans.

The Attempt To Kill Paul, verses 19, 20.—This incident did not help the work of Paul. "The people went home shamefaced, feeling that they had made fools of themselves. Their mood was a hotbed for suspicion. If these men were not gods, then they healed the cripple by the power of the Evil One."

News had reached the jealous Jews of Pisidian, Antioch, who had driven the apostles from their city, that they were preaching at Lystra. With other hostile Jews from Iconium they came to Lystra, and easily persuaded the people there to turn against Paul.

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: Captain Jimmy is forced down on a deserted island while flying General Lu from China to Japan. They find no game, so decide to try their luck at fishing.

Early the next morning we kindled a huge bonfire on the bald peak of the island, and piled on plenty wet grass to make smoke. If any ship passed within miles, it would be sure to see our signal.

All day we gathered wood and piled it near, so we could make a big bright fire through the night. The interpreter and I went down to the shore to fish.

Taking a pin from my coat I made a rough fish hook. This I fastened to the end of a long cord, and cutting off a corner of General Lu's bright colored cloak, we had a home-made, but attractive fish-bait.

The interpreter begged for a chance to try his luck and I let him go first. We selected a little sandy cove, where the tides cut a deep hole between two rocks. At high tide the water formed a clear, round pool, shallow at the edge, but rapidly sloping down until the bottom disappeared among the green shadows.

The interpreter waded out to his waist, then dropped his bait into the pool. General Lu and I sat lazily on the shore and watched him. Suddenly he gave a quick yank—his pole bent almost double. A great silver fish leaped high in the air, and the battle was on.

General Lu sat still as a mummy, but I fought that fish all over again. Several times it rose to the surface and came down with a grand splash. Then we could see it scooting along just a few inches below water—straight toward its captor.

Right between the interpreter's legs I saw the fish. Then both fish and Chinese submerged out of sight. A tremendous fuss and splashing began, after which the Chinese arose, dripping with his prize clasped tightly in his arms.

The pair looked too funny for words. I began to laugh, when the General gave a sharp exclamation and pointed to the entrance of the cove.

For an instant I froze with dread. A sinister black fin, clove the smooth surface of the water like an arrow, rushing straight toward the unsuspecting Chinese. With a yell I grasped a short sword which General Lu still wore at his side, and plunged into the water between the rushing black fin and Hsu Fu.

The shark turned and made for me instead. The water reached my belt—too high for quick action. I waited for the one chance I knew would come. The shark turned on his back and opened his huge mouth to grab me, while row after row of gleaming teeth, sharp as razors, glittered menacingly.

I dodged to one side, and lunged at his smooth white stomach with my sword. In my excitement I only scratched him, and he turned again, mad as a whole nest of bumblebees. Murder shone in his little pig eyes as he rushed into the fight.

This time I drove my sword straight down his throat. With a great whirl and a splash he closed his teeth on the blade and darted out of the cove, leaving a thin red line in the water after him.

Meanwhile the Chinese rushed for the beach yelling strange sounding things at the top of his voice, and the beautiful silver fish swam slowly out to sea, with a reproachful look on its face, and a contemptuous wiggle of its tail. "Fine lot you know about fishing!" it seemed to say.

After that General Lu was quite huffy about the loss of his sword. Soon the sun sank into the sea like a great golden ball, and we made a huge bright fire up on the rock to attract any ships that might pass in the night.

(To Be Continued.)

NOTE:—Any of our young readers writing to "Captain Jimmy," 2010 Star Building, Toronto, will receive signed photo of Captain Jimmy, free.

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. . . . Pound and half pound tins at your grocers

The fickle crowd proceeded to stone Paul and to drag him outside the city supposing him to be dead. In the catalogue of his sufferings which Paul gives in 2 Cor. 11.25, he says, "once I was stoned," and it may be that among "the marks of the Lord Jesus" which he bore in his body (Gal. 6.17), were the scars left by this attack. As the disciples stood around the unconscious Paul—his work had not been in vain, after all, for there were Christian disciples now in Lystra, Christians brave enough to defend him—Paul arose and went back into the city. His ability even to stand, after such cruel stoning, seems quite as much a miracle as had the cripple's standing on his feet. He was able the next day to go on with Barnabas to Derbe, several hours distant.

Queer Thing To Steal

Because tombstones attracted him, Juan Valadez must spend nine months in jail. He was found guilty of stealing tombstones from the municipal cemetery in Juarez, opposite El Paso, in Mexico.

"I don't know why I took them," Valadez said.

"You can think it over nine months," said the court.

Depression Has Not Affected Some Lines

Tobacco, Bathing Suit, and Fishing Tackle Industries Report Big Sales

The ill wind of depression is rolling up good-sized profits for more than one American industry.

Cigarette makers and bathing suits, fishing tackle and small arms and ammunition manufacturers, for instance, report to the Department of Commerce that sales this year exceed even those of the years when a depression was something to read about in the history books.

Wags say cigarette consumption increased because the country is trying to be nonchalant.

But a Commerce Department statistician suggests that many working men who could not smoke on their jobs have plenty of time for it now. Most opinion however, is that the gain rests on the fact that tobacco for many is the cheapest of pleasures.

As for bathing suits, families that used to pack off to Europe, or tour the National Parks, or visit big resorts are going to the old swimming holes it is believed.

Certainly steamship bookings have been drastically curtailed and the attendance at National Parks has slumped. But at least one bathing suit manufacturer reports larger profits than before.

Larger sales of fishing tackle and arms are not so easily explained. Increased leisure may be a factor, but officials believe in some places the search for fish and game is inspired by a real necessity of cutting down food bills and a desire to make a little money from the sale of pelts.

To Prevent Gas Wastage

Conservation Problem In Turner Valley Oil Field Now Well Advanced

F. P. Fisher, the Ohio oil expert who has been engaged by the Alberta Government to enquire into the conservation problem in the Turner Valley oil and gas fields, is now well advanced in the preliminaries of his work, making a thorough survey of the situation with a view to working out a definite and adequate plan for preventing wastage and for properly controlling the flow from present and prospective wells.

Fertilizers For Prairie Provinces

In the first half of the current year the Consolidated Mining and Smelting Company turned out 2,500 tons of fertilizers, the bulk of which was shipped to various points in the Prairie Provinces.

PIPER WINS DISTINCTION

The distinction of having piped before two reigning Siamese monarchs went to Piper William Campbell, of New Westminster, B.C., after King Prajadhipok, incognito as Prince Sukhodaya, officially opened the Banff Highland Gathering on Thursday, August 27, at Banff Springs Hotel. In 1894, when King Chulalongkorn, of Siam, father of the present Siamese ruler, visited England, Piper "Willie" Campbell was special piper to Her Majesty Queen Victoria and in that capacity accompanied the two sovereigns wherever they went. In the picture (right) which appeared in the London Graphic of 1894, King Chulalongkorn is shown with Queen Victoria. Piper Campbell is in the left of the same picture. On the extreme left he is shown photographed at Banff, where he has attended the annual Highland Gatherings since their inauguration.

SUPPORT ASKED BY BALDWIN FOR THE NEW CABINET

London, England.—Rt. Hon. Stanley Baldwin, leader of the Conservative Party and president of the council in the new three-party government, appealed to every Conservative member of parliament to support the emergency cabinet's financial legislation.

"The forthcoming session is to be one of the most critical in our history," Mr. Baldwin said in a letter sent to all of his parliamentary followers. "I beg of you at whatever personal sacrifice, to be present on the appointed days and to give your consistent support to the government to enable them to pass the necessary financial legislation."

"Failure to do your duty throughout this crisis would be dishonourable to us as a party and disastrous to the national interests."

The Conservative leader's appeal was issued as the cabinet continued its battle to balance the budget. After a three-hour session it was announced, the ministers had completed their labors in connection with the economy section of the national plan and that their forthcoming deliberations would be mainly concerned with the financial question—that is, new taxes.

Stress was placed on the great progress made, and officials generally were optimistic that the new government has excellent prospects of "pulling England out of the hole" without visiting unusual sacrifices on the already over-burdened population.

It was believed a vote of confidence would be sought almost at the opening of the House or at least after two days' debate on certain resolutions which must precede the budgetary proposals of the Government.

The Associated Society of Locomotive Engineers and Firemen adopted a resolution repudiating the new government and urging the adoption of a definite Socialist policy by the Trade Union Congress and the Labor Party "with a view of changing the present credit system of the nation and combatting the power of capitalist financiers, both national and international."

Rt. Hon. J. H. Thomas, secretary for the Dominions, who resigned from his official position with the National Union of Railwaymen before being dismissed, was angry when he heard that the organization had voted against giving him his pension.

"It's cruel, harsh and vindictive," he said. "It's not the railwaymen I knew."

Market For Wheat In China

Our Surplus Wheat Would Save Thousands Of Chinese Now Starving

Montreal, Que.—Canada's surplus wheat in elevators throughout the Dominion would save the lives of thousands of Chinese now starving in the areas flooded by the Yantse River and possibly be the means of furnishing a future outlet for Canadian wheat that would prove of great benefit to this country. Wong Han, prominent member of the Montreal Chinese colony, stated here.

He thought that there was an excellent market for the hard wheat of Canada in his homeland. "The Chinese," he explained, "will never eat bread to any great extent, as it is a food absolutely foreign to them and would require cooking equipment not found in the average Chinese home. Canadian wheat, however," he went on, "could be used freely in the preparation of Chinese dishes, such as the making of dumplings and noodles, and its use for this purpose would take millions of bushels of Canadian wheat yearly."

Requires Aid From Ottawa

The Pas, Man.—Premier John Bracken told The Pas Board of Trade that the province is unable to meet the entire cost of the Mafeking Highway, but that if The Pas can persuade the Federal Government to guarantee 50 per cent. of the cost of the road, work on it would start the next day.

Thirty-five years ago, the automobiles were set about 20 inches from the ground; whereas today the usual clearance is about 12 inches.

Duty On Magazines

Customs Tariff Now In Effect Affecting American Publications

Ottawa, Ont.—Nearly 450 periodicals are contained in the partial list, issued by the Department of National Revenue here, of magazines upon which a customs tariff will be imposed as from this date.

The department makes it clear that the list is not complete, and that a further list will be issued "when the necessary information is furnished to the department by publishers of other periodical publications."

Three sections and two sub-sections of the customs tariff—148B to 184D inclusive—are applicable to all magazines imported into Canada from foreign countries, for such publications from Great Britain and other parts of the British Empire are not affected, nor is there any provision for the imposition of a duty on the periodical publications issuing from trade treaty countries.

The list covers United States magazines exclusively. A number of those of the short story type are boosted in price, by reason of the new tax, to a cost that may cause their total disappearance from Canadian news stands. These came within the classification of "periodicals or newspapers consisting largely of fiction, etc."

Scientific publications, religious magazines and others devoted to comment on public and cultural affairs, and to travel and exploration, which carry articles of an educational character are listed free.

Wheat Shipment At Churchill

Workmen Cheer When First Train Load Of Wheat Arrives

Churchill.—The dream of 50 years of western Canada was realized when 24 cars of No. 1 Northern wheat arrived at this bay port en route to European markets. This is the first wheat ever to come over the Hudson Bay rails into the 2,500,000 bushel wheat elevator.

All the workmen for Carter-Halls-Aldinger, and the Department of Railway and canals were present when the epoch-making event took place. Eskimos and Indians, only dimly realizing the significance of the event, were present in large numbers. When it was definitely learned the wheat was the principal part of the cargo, cheers arose from the groups of workmen and the engineer blew loud blasts in answer.

General Disarmament

Legion Believes War Should Have No Place In Civilized World

Niagara Falls, Ont.—Reaffirming their belief that war has or should have no place in a civilized world and approving the campaign of the League of Nations Society in Canada to advance the cause of general disarmament, delegates to the Canadian Legion Convention unanimously passed a resolution to that effect. The resolution was qualified, however, as follows: "This resolution of approval is not, however, to be taken as approving of disarmament by individual nations, and expresses the opinion that it is the duty of Canada to maintain adequate defence forces."

Second Ship To Churchill

Will Pick Up 7,000 Tons Of Grain For Shipment To Europe

Montreal, Que.—The stout steamer "Warkworth" sailed from Montreal, September 1, for Churchill, Canada's new grain port on Hudson Bay, to pick up 7,000 tons of grain as an experimental shipment to Europe. The S.S. Farnworth sailed August 28, from Newcastle-on-Tyne for Churchill.

The "Farnworth" is expected to reach the port about September 12, with the "Warkworth" due about two days later. With but little ice in Hudson Bay, conditions appear to be favourable for the experiment, according to local shipping men.

Welfare Of Workers

Moscow, Russia.—Addressing the general conference of Moscow engineers, V. Kuybyshev, chairman of the state planning commission, declared that Soviet Russia, having virtually achieved its aim to industrialize the nation in less than five years, intends in 1932 to devote more attention to the welfare of workers and peasants.

W. N. U. 1906

CELEBRATES BIRTHDAY

Sir George Foster, member of the Canadian Senate, who celebrated his 84th birthday on September 3. He is the last survivor of any of Sir John A. MacDonald's Cabinets in the wider Dominion sphere.

Economic Situation

Solution Of Difficulty May Lay In Shortening Of Working Hours

Saskatoon, Sask.—Solution of the present situation lay perhaps in shortening of working hours while maintaining the present standard of living, stated Hon. Howard McConnell, Provincial Treasurer, when speaking to a local service club. Mr. McConnell dealt with the economic situation generally and stressed the need of great economy in the province. He predicted that revenue this year would fall far short of requirements, laying the blame for this largely at the door of the agricultural situation in the south of this province.

British Films

May Erect Chain Of Theatres In Canada To Show Pictures

Toronto, Ont.—British motion picture producers would find their way into the Canadian market regardless of the attitude of the Canadian motion picture industry, declared F. W. Fields, of Montreal, British Trade Commissioner in Canada, addressing a meeting under the auspices of the National Council of Women at the Canadian National Exhibition here.

If Canadian theatre owners were not more friendly to British pictures he predicted the erection of a chain of British theatres to show films from that country here.

Soporific Books

Dean Inge Would Have Doctors Prescribe Books For Insomnia

London, England.—Doctors should prescribe books by certain authors as a cure for insomnia, suggested Dean Inge, of St. Paul's, at the Library Association Convention here.

"I have often found my wife sleeping peacefully with one of my books upside down on her knee," Dean Inge said.

Young Wins Swim Marathon

Toronto Swimmer Defeats Field Of 180 Contestants

Toronto.—George Young, Toronto, who for years has sought vindication, found it today. Meeting Lake Ontario when the lake was at its cruellest, Young defied it. He smashed through cold, cold waters for 15 miles to win the world's professional swimming championship, \$10,000 in cash and vindication in the eyes of Toronto's citizenry. In the last gruelling drive, he crossed the finish line shortly after 7 o'clock, swam perhaps 20 feet farther, then collapsed. The lake had its way in the end—but not before George had proved beyond all doubt his superiority over a field of 180 contestants who started one of the cruellest, most brutal grinds in the history of swimming.

Young was leading by nearly a mile at the finish line, and all talk of his being a "front runner," the boy who quit under pressure, was set at rest by his performance. Gone, too, are the cutting and untrue remarks that the Catalina victory of 1927 was a "fluke."

The prize winners were:

George Young, Toronto, first, \$10,000.

Bill Goll, New York, second, \$2,500.

Warren Anderson, Sydney, N.S., third, \$1,000.

And these were the only swimmers to finish the ordeal.

An Epochal Event

Minister Of Railways May Witness First Grain Shipment From Churchill

Ottawa, Ont.—Hon. R. J. Manion, Minister of Railways and Canals, may witness the first grain shipments to move from Churchill over the Hudson Bay route.

Arrangements have been rushed to permit two cargoes of wheat to be shipped about September 15 for Great Britain. Dr. Manion has not decided definitely whether he would be presiding officials of the Department of Railways but, in any case, several high ways and Canals will make the journey.

Costs Can Be Reduced

Finding Of Conference On Production Expenses Of Wheat

Calgary, Alberta.—Wheat producers attending conference here with a view to cutting down production expenses closed their sessions with the decision that costs can be reduced, and wheat will continue to be for many years to come the basic western crop.

The conference formed the second part of a two-day program, the first being field trials and tests of farm machinery at the Midnapore Ranch of Senator Patrick Burns.

Communist Activities

Drumheller, Alberta.—Coal mine operators of the Drumheller field have been asked by Red Deer Valley unit No. 90 of the Army and Navy Veterans in Canada, to make careful selection of employees because of Communist activities in the district.

GRAND CHAMPION

Holding the record maintained in all showings at the Canadian Pacific Exhibition, Vancouver, the Strathmore herd from the Canadian Pacific Railway's supply farm in Alberta proved unbeatable in the bull classes. "Gano Paul Bruce," awarded senior and grand championship for bulls at Vancouver, adds another red ribbon to his decorations from this season's major exhibitions. "Gano Paul Bruce" holds three firsts and the grand championship from Calgary, Saskatoon and Regina, and took second place at Edmonton. His record in 1930 made him first prize aged bull in Holstein classes at Vancouver, Victoria, Spokane International, Washington State Fair, Yakima; Interstate Fair, Puyallup, and Pacific International, Portland. Also in 1930 he claimed the grand championship at Spokane, Yakima and Puyallup. He goes now, with other Strathmore Farm exhibits to the north Pacific Coast fairs.

LEGION OPPOSED TO LEGALIZING SWEEPSTAKES

Niagara Falls, Ont.—The Dominion convention of the Canadian Legion expressed itself as opposed to the idea of legalizing sweepstakes in Canada. The convention adopted, with only one dissenting voice, a report of a special committee, advocating that no steps be taken for a change of the law regarding sweepstakes. The committee urged that the Dominion command be instructed to oppose, now and in the future, any attempts to alter this law.

It was also recommended that the proffered gift of \$57,023 from the Army and Navy Veterans' Association of Canada, which, it was claimed, was wholly derived from sweepstakes, be returned forthwith to the donors.

The claim of an Alberta delegate that many branches in that province would be in open rebellion if the report was adopted was not heeded by other delegates. The Alberta man claimed if sweepstakes were legalized the legion ought to participate in them. Rev. E. R. Adye of Whitby, Ont., declared if the branches were ready to rebel because they could not have such a way of raising money, the legion would be better off without them.

Imperial war veterans were given consideration in a series of resolutions presented to the convention and given the approval of the gathering. One resolution urged that Imperial ex-service men resident in Canada for three years or more, be entitled to the benefits of the War Veterans' Allowance act and all social legislation in the way of relief to war veterans. It was also asked that men who had been transferred to the Imperial Army from the Canadian Army be given the same consideration as Canadian ex-service men.

Appointment by the British Government in each province of the Dominion, of a representative of the British Ministry of Pensions was urged by the convention.

A comprehensive and detailed report, reviewing the activities of the Canadian Legion since the last Dominion Convention at Regina, in November, 1929, was presented Wednesday morning, September 2, by Major J. R. Bowler, Dominion general secretary.

During the year from July, 1930, to July, 1931, the report shows 1,269 major pensions were recorded, while some 3,000 cases other than pension were recorded.

The report reviewed its activities in securing new pensions legislation, and the War Veterans' Allowance Act. Figures quoted in the report show that up to August 17, 1931, 7,654 applications for war veterans' allowance had been received, and that of these, 3,195 had been approved, and 3,700 declined, while 393 applicants were considered ineligible and 48 were withdrawn.

Vancouver was selected for the next annual convention of the Canadian Legion British Empire Service League, at the concluding session of the convention here. The Pacific Coast city defeated Ottawa and Port Arthur for the honour. The date of the 1932 gathering has not yet been decided.

New Freight Tariff Protested

Calgary Board Of Trade Draws Attention To New Ruling

Calgary, Alberta.—Protest to the Board of Railway Commissioners at Ottawa over the filing of a new tariff by railway companies which would make shippers pay freight on dead or crippled animals was made by the Board of Trade here.

The board claimed that a double charge could be made under the new tariff, but railway officials replied that the tariff had been in effect in Ontario for a year and no complaints raised.

Christening Ceremony

Montreal, Ont.—Christening of the infant son of Their Excellencies the Governor-General of Canada and Lady Bessborough will take place in St. Bartholomew's Church, Ottawa, on September 22. Official announcement to this effect was made at "Ravenscrag," temporary residence of Their Excellencies here.

ternoon each week.

EDOUARD J. ROULEAU,
Editor and Publisher

The manager of a well known Card-
ston store describes the local news-
paper as "our best clerk." He explains
that it sees more people, gets more of
their individual time, works longer
hours and tells its story with more ac-
curacy than any other clerk they can
employ. These papers are going into
the homes of people, and are assured
of their friendly attention. This is
proved by the tremendous growth in
importance of the press in the last
few years, according to the manager
who declares that today the local pa-
per is the backbone of any construc-
tive sales effort.—Cardston News.

RESOLUTION OR REGENERATION

(By Rev. Wm. McNicol, M.A.)

Shall our economic system be re-
constructed, or will some other system
be substituted by revolution? Some
such question is being asked by many
thinking people today. We may as well
admit that the present system (Ca-
pitalism) can be reconstructed. It can
also be overthrown and some other
system substituted for it. But there is
a more fundamental question. Are our
economic ills to be cured by the patch-
ing up of one system, of the substitu-
tion of a different one, or are they
to be cured only by the extending of
Christ-mindedness, and Christ-like-
ness in living, that, whatever the sys-
tem, justice, equality, and fraternity
shall prevail among all peoples?

I think the conviction is growing
that something more than any par-
ticular system is essential to economic
welfare for all people. The life of the
nation is threatened today by three
deadly foes—self-will, self interest, and
self-complacency. There never was a
time in the history of civilization when
the nation needed the inspiration and
the guidance of a compelling religious
faith more than it does today. For
such faith the nation has a right to
look to the Christian church. And if
the church is to be the guide the na-
tion needs in the present crisis she
must realize that her strength does
not lie in political policies, economic
programmes, ceremonial pomp, or ma-
terial resources, but in the truth she
teaches, the life she communicates,
and the character she inspires. The
work of the church is to change men,
not systems, and wherever she suc-
ceeds in this, there economic peace
and economic justice prevail, no mat-
ter what system is on the throne.

In Canada the economic system is
capitalism. In Russia it is supposed
to be Communism, but both nations
seem to come out at the same place.
Lenin was wedded to his system, and
succeeded in rooting capitalism out
of Russia. He has put his theory into
practice and has had ample time to
test it, and has found that it wouldn't
work because the people wouldn't work,
and has been compelled to make modi-
fication after modification of his plans
until he has carried the system back
far on the way toward that from which
he broke away. We are compelled to
conclude that the issues of life are not
out of systems, but out of heart. Men
pin their faith to some system, and
when it fails, or results are not what
they expected, they want to substitute
something else, but it becomes increas-
ingly evident that the great need is
not for new systems, but for new hu-
man hearts; not for new social and
economic devices that the church must
help to supply, nor for revolution or
reconstruction, but for Christianization

and Regeneration. I know, and I pre-
sume we all know, that by the un-
thinking masses, the moneyed men, in
a word, the captains of industry are
held largely to blame for the economic
depression of the present time. But
why should they be held responsible?
Many of them are fine Christian gen-
tlemen, who make earnest efforts to
bring about economic justice and peace,
and they make such efforts because
they are Christians, and not because
they are captains of industry. If the
men who possess wealth are not Chris-
tians, you have no right to expect them
to be free from the power of self-will;
self-interest; and self-complacency.
Thus you see at its root, the problem
is a Christian problem—a problem for
the church, and not a problem for the
captains of industry. What we need
in capitalism, is the strengthening of
the sense of social responsibility. The
sense of social responsibility has no-
thing to do with system, but it has
everything to do with men. It is rooted
in human brotherhood.

I cannot do better than close this
article by quoting the following para-
graph from an American correspond-
ent to a religious magazine:—"The
church must make the problem pri-
marily an individual one, for the
church deals with individuals. The
time has come when individual men
and women are faced with this prob-
lem, both in their personal life and
in their corporate life. For some it
will doubtless mean sacrifice, and for
all the fraternal spirit that will work
out a program consistent with Chris-
tian ideals. It may lower income, but
it will make for life and happiness in
the lives of millions of men, women
and little children. While it is true
that the unemployed man does expect
the church to perform economic mira-
cles, he does ask that it shall care

supremely for the human problems in-
volved, be responsive to human suf-
fering, and insist that things are for
men, not men for things; that industry
exists for society, not society for in-
dustry; that social duty must always
take precedence over private right;
that faith, not fear, is the only basis
of a sound, permanent, and effective
industrial order."

BUSINESS UPTURN IS VERY ENCOURAGING

An immediate upturn in business
conditions, which should hold at least
until the end of the year, was fore-
cast in Montreal by Paul Clay, New
York statistician. The upturn may well
mark the end of the great agricultural
and industrial depression, he said.

"If the trade revival is as good as
I hope, it should, I think bring about
good business conditions for at least
two years," said Mr. Clay. "But we
won't be in a position to say whether
it will be a continued upturn until
January of next year."

Mr. Clay declared that he had no
doubt whatever, of the coming of an
immediate trade revival. "I base my
judgement on the immense reductions
in loans and credits; on the liquida-
tion of inventories and the extensive
deflation of money rates. Besides the
stock market is once more acting bu-
lish."

But permanent prosperity cannot re-
turn to the North American Continent
until the manufacturing concerns are
once more on a dividend paying basis,
said Mr. Clay, and this in turn cannot
be achieved unless average industrial
production increases by at least ten
per cent.

kitchen

■ Full strength for Sink Drains ■ Full strength for the toilet bowl ■ In solution for all general cleaning

GILLETT'S Lye "Eats Dirt"

Flake Lye

*Lye should never be
dissolved in hot water.

KEEP a tin of Gillett's Lye handy and you can cut your kitchen cleaning time in two.

Greasy pots, pans and dishes, soiled walls, the kitchen floor, etc. : : : all can be more quickly and thoroughly cleaned with a solution of one tablespoonful of Gillett's Lye dissolved in a gallon of cold* water.

To keep drains free-running, pour a small quantity of full strength Gillett's Lye down them each week and they'll never clog with dirt and grease accumulations.

Gillett's Lye has many handy household uses. Send for the new FREE Gillett's Lye booklet explaining how it will make all your cleaning easier.

Little Helps For This Week

"Every man shall receive his own reward according to his own labour."
—1 Corinthians iii. 8.

Our Father
Will no gentle deed disdain:
Love, on the cold earth beginning,
Lives divine in heaven again;
While the angel hearts that beat there
Still all tender thoughts retain.
—Adelaide Anne Proctor.

How shall we enter when for us
the golden gates roll back? Shall we
go home as children whose home-
coming is not only welcomed and
watched for by the heart of Heavenly
Fatherhood and the heart of Heav-
enly Brotherhood, but by many and
many a one to whom we have given
a smile or a word of love for Christ's
sake?—Rose Porter.

Drakes Of Modern Times

Men Recently Sailed Across Atlantic
In Small Boats

Ten little sailboats set out from
Newport on July 4 on a race across
the ocean to The Lizard, off Ply-
mouth. The winner, the 63-foot "Dor-
ade," ran into Plymouth Harbour, al-
most exactly seventeen days out from
this side. One of the others had to
signal to a passing liner for supplies
and to have two of her crew taken
off after a storm that partially dis-
masted her. Having got what she
needed, she set off again to make up
for lost time.

To set sail across the North Atlan-
tic in a fifty-foot yawl calls for a lot
of courage to begin with. There are
wicked summer storms that shake up
even the biggest liners and in which
these cockleshells would seem to have
but the smallest chance of survival.
To cross in seventeen days, some of
them of light airs, means not only
courage but the willingness to take
every chance.

We marvel at the courage of the
men of old who crossed the Western
Ocean in their tiny ships, but the Brit-
ish and American skippers are their
worthy successors. The ocean has
not changed since 1492 and a 50-foot
yacht in the grip of its wrath would
be just as helpless as a "Golden Hind"
or a "Santa Maria." We still have
our Drakes, our de Gamas and our
Magellans, even in what is said to be
a softer age.

Persian Balm is magical in creat-
ing alluring complexions. A little
gentle rubbing and your skin is in-
vigorated and touched with the true
beauty of youth. Charmingly frag-
rant. Delightful to use. Cools and
caresses the skin. Relieves all rough-
ness and chafing caused by weather
conditions. Tones and stimulates.
Enhances and protects the loveliest
complexion. Unrivalled as a perfect
aid to beauty and charm.

Convention Cancelled

Annual Meeting Of Canadian Clubs
Will Not Be Held This Year

Announcement that the annual
meeting of the Association of Cana-
dian Clubs, scheduled to have been
held in Regina, September 11 and 12,
will not take place, came from Gra-
ham Spry, the association's national
secretary.

While no official reason for the de-
cision was given out, it is understood
that due to prevailing economic con-
ditions the affiliated clubs of the as-
sociation agreed to a recommendation of
the national executive that this year's
sessions be eliminated.

According to a report made by Mr.
Spry at a recent executive meeting,
the association is concluding a most
successful year. There are now affili-
ated with the association 94 of the 105
active Canadian clubs from coast to
coast.

CORN S
Lift off - No Pain!

QUICK
RELIEF

Just a drop or two of Putnam's on
any sore corn and out comes all the

CHAPTER XXIX.—Continued.

"If we had a Nancy, and—and a
mother . . ."

She looked up at him with pleading
eyes. Halliday winced, and Uncle Sim
said tactfully: "I don't doubt, little
girl, but what Sonny'd be real proud
to lend you his mother, and his little
sister, too, most any time. And you
got a daddy you think a whole heap
of, or my name ain't Simeon Augustus
Bartlett."

The child looked up at Halliday with
a smile that was sweet as a caress.

"Martha Halliday," called Julie
from the window, "you got to come
right in now and get ready if you're
goin' to church with me."

"Seems like Julie Nipps is gettin'
pretty regular in her devotions," com-
mented Simeon dryly. "Ain't seen
her miss a Sunday in three weeks."

"It's her perm'nent wave," Martha
explained soberly. "She says there's
no use having it if you don't go some-
where to show it off. It cost twenty-
five dollars 'sides her carfares to
Summerfield."

"Well, well," chuckled Simeon, "it
would be a pity if the Lord was to
overlook it after Julie's goin' to all
that expense. I've heard o' some
strange things bein' the cause o' sal-
vation, Halliday, but I do no but hav-
in' yer hair crimped, is the strangest
yet. You run along, child, and get
ready like Julie says. 'Tain't everyone
has the chance to go to church along
beside an expensive head like that."

"When I grow up I'm going to
have one, too," Martha announced so-
berly.

"You won't need one," smiled Hal-
liday, rumpling her curls with a ten-
der hand. "Your good fairy gave you
one when you were born."

"You don't get perm'nent waves
from fairies," said Martha, with fem-
inine scorn for his ignorance. "You
get 'em at the hairdresser's in Sum-
merfield."

Halliday's laugh carried across the
garden to where Nick sat on the
porch worshipping his daughter, while
Gay lay in the hammock beside him.
He was holding the baby with all the
ease of a veteran father, and saying
"Young lady, if you don't grow up the
image of your mother, I'll disown
you."

Gay smiled.

TO KEEP YOURSELF
HEALTHY

The lot of most people is much
indoor work and little real exer-
cise. That's why it's sensible,
every so often, to give the system
a gentle, thorough cleansing
with Dr. Carter's Little Liver
Pills. All vegetable. 60 years
in use.

CARTER'S LIVER PILLS

W. N. U. 1906

"Better be careful what you threat-
en, Daddy. She has her father's
straight, aristocratic nose."

"You can't tell about noses this
soon," said Nick, grinning. "But any-
how, I'll forgive her the nose so long
as she keeps your eyes. Wonder what's
happening across the way. I haven't
heard Halliday laugh like that in a
dog's age."

He spoke of it again that evening,
when Uncle Sim was indulging in a
pre-bedtime smoke in company with
their neighbor. The night was still
with the stillness of a summer Sun-
day, and occasionally the rumble of
the old man's chuckle was carried to
them on the air.

"Halliday's got a firm ally in Uncle
Sim," said Nick. "A year ago who
would have dreamed of such a thing?
But there's a big change in Halliday.
He told me the other day that he was
heartily ashamed of some of the stor-
ies he's published, though at the time
he thought them merely realistic! He's
writing a book now—a child's book.
Just imagine it! It's something
he invented for Martha's benefit, and
she begged him to write it down. That
little girl has done a lot for him; but
I've an idea that his reformation's not
wholly due to her."

Gay did not speak. She was vision-
ing the night when Halliday had said
goodbye to her, before starting out on
what had seemed like a hopeless
quest. He had called her "a light in
the dark." He had kissed her hands,
gently and reverently, to be sure, but
not as one kisses the hands of a sis-
ter or a friend. Gay knew what had
changed James Halliday; but, since it
was his secret . . .

Nick was saying, quietly: "Do you
know what I think has changed him,
Gay? I think it's you."

She started, visibly.

"Why—why should you think
that?"

"Just a hunch, that's all. He's been
unhappy, and knowing you—seeing
what a woman can be, dear—well, it
would mean a lot to a lonely man like
Halliday."

A fugitive smile hovered on Gay's
lips.

"Isn't it possible that you overrate
my virtues? I wonder" (there was
the least bit of a pause), "I wonder
when Mrs. Halliday is coming back."

It was the first time she had men-
tioned Angela, and Nick himself had
no desire to speak of her. Now he
said: "Not at present. Never to
Bakersville, I think. That's what I
gathered from something Halliday
said."

"You don't mean they've separat-
ed?"

"I believe they don't call it a sep-
aration; but it amounts to the same
thing. She's going abroad for the win-
ter anyhow, and Halliday's to stay
here with Martha. She—I—" Nick
hesitated and flushed a little. "You
were right about Mrs. Halliday, Gay.
She's not to be trusted."

Gay's hand slipped into his.

"Is that all you have to tell me,
dear old boy?"

He looked at her, laughing in a
way that would have reassured even
a doubting wife, and Gay was very
far from being that.

"Are you expecting a tale of in-
trigue and treachery, my dear? Well,
there was intrigue, perhaps, on her
part, but no treachery on mine. Do
you remember when Uncle Sim ex-
pounded the laws of a happy marriage
to us? He said if ever I made a fool

of myself that I was to own up and
you'd forgive me."

"And you made a fool of yourself,
Nick?"

"No; that is, not a noticeable fool;
but will you forgive me just the
same?"

"For what?"

"For not seeing through the lady in
the first place."

She smiled.

"What opened your eyes at last?"

Nick looked thoughtfully into space.
"I think," he said slowly, as if he
were trying to get at the real truth,
"I think that first it was a kiss. Lat-
er—"

"A kiss! Nick, you—you—"

Nick grinned.

"Don't get excited, Gay. It was she
kissed me; an absolutely surprising
and unsolicited caress. It—'flabber-
gasted' me, as Uncle Sim would say.
I vowed that night I'd tell you all
about it. Hence this confession."

"And—later?"

He turned, meeting her eyes square-
ly.

"We won't go into that." Unknown
to himself Nick's voice had taken on
an unfamiliar harshness. "It was
only a scene—a scene between Mrs.
Halliday, her husband, and myself. It
showed me just what she was; and I
told you, James Halliday needs all
the sympathy you can give him. I
can't say any more about it. I can't
even think of it, and stay calm. Some-
day, perhaps, I'll tell you. Not now.
All I ask is that you believe that I've
done nothing to be ashamed of."

"I never believed anything else,
Nick; only I wondered—"

"Don't wonder."

He drew her close for a long mo-
ment, and kissed her gently. After
her journey into a land of doubt and
fear, she seemed something exquisitely
dear and fragile to him. He said,
quietly: "Gay—you should have told
me about the baby. It would have
saved—"

"I know," she broke in hurriedly,
"I know; but I couldn't foresee the
things that were to happen, could I?
And I was worried about you, Nick.
You weren't yourself. Mr. Maxwell
saw it as well as I. We knew you
needed a change—a chance to get
away from all perplexities and wor-
ries. Besides, I wanted you to feel
free, dear. I have always wanted you
to feel free. You shared your freedom
with me so generously. I said to my-
self the day we went away together,
when I was tying up that ridiculous
bandanna, that whatever happened I
must never by word or look mar the
joy of your adventure."

"And Life's an adventure to you,
Nick—the whole of it. It's just as
that, somehow, we have to travel.
I've tried, honestly, to help make it
the happy highway she wanted you to
know; but I've sometimes thought"
(Gay smiled, a smile that illumined

for SCIATICA
Wash the painful part well
with warm water; then rub in
plenty of Minard's and
you'll feel better!

MINARD'S
"KING OF PAIN"
LINIMENT

her face softly like candle-light) "I've
sometimes feared, Nick, that I've been
responsible for a good deal of dust
along the way!"

He met her smile with eyes that
were wholly serious.

"Dust! I'd say you were the brook
that quenched my burning thirst. You
have never failed me. Gay. You never
will; nor shall I fail you. I've had
time to think in these weeks when
you've seemed so frail that I've been
almost afraid to look at you for fear
I'd see you blow away. I've threshed
out this freedom business from A to
Z. And I know at last that freedom
is not the ability to answer the call
of the road at a moment's notice. It's
not the shifting of life's responsibil-
ities to other shoulders. It's something
within ourselves—this freedom; and
once we know it—once we honestly
believe it—we are free!"

A silence followed before Gay said
gently: "I've known that for a long
time, Nick. I could have told you, of
course; but—but I thought you'd be
happier to find it out yourself."

Nick answered, his voice a bit un-
steady: "You are a very understand-
ing person, Gay."

It was dark now on the little porch,
and very peaceful. Dim stars shone
faintly above; and the air from the
garden was sweet with the fragrance
of summer. A breeze sprang out of
the West, stirring the leaves in the
tree-tops; and far in the distance,
heat-lightning brightened the sky.

Gay rested her cheek contentedly
against Nick's shoulder. He smiled,
moving his arm to bring her closer,
while through the evening stillness
came the echo of Uncle Sim's big
laugh.

"It's a great old world," said Nick.

THE RHYMING
OPTIMIST

By Aline Michaelis

SYMBOLS

Not the cloud, or the wave, or the
bough

Is the thing that I love,
Though I linger till dusk turns to dark
As the sky's pageants move.

Though I find in the voice of the sea
Always comfort and peace,
And that deep in the forest's green
aisles,

Care will grant me release.

Through the glory of cloud-flight I
look

To the glory beyond,
And I seek for the stars in the sky,
Not the stars in the pond.

Not earth's beauties before me that
move,
But hid beauties I guess;

And it is not loved hands that I love,
But the love they express!

Saskatchewan Industries

The gross value of the manu-
factured products in the eight cities of
the Province of Saskatchewan
amounted to \$71,839,769 in 1929, that
of Regina being \$34,842,487; Saska-
toon, \$15,961,102 and Moose Jaw, \$14,-
646,351.

attended the wedding of Miss Joan Agate to Mr. Fred. Schafer, at St. Michael's and All Angel's Church.

WHEAT REACHES CHURCHILL

Western Canada's dream of fifty years was realized September 1, when 24 cars of wheat arrived at Churchill port, en route to European markets. This is the first wheat ever to come over the Hudson Bay Railway into the new and most modern 2,500,000 bushel elevator. Wheat originating along the lines of the Canadian National Railways in northwest Saskatchewan has the distinction of forming the first shipment, and to the Canadian Wheat Pool goes the honor of shipping the grain.

Eskimos and Indians at the bay port only dimly realizing the epoch-making event, were present in large numbers.

VILLAGE OF CARBON**TAX SALE**

NOTICE IS HEREBY GIVEN that under the provisions of the tax recovery Act, 1929, the following lands situated in the Village of Carbon, Alberta, will be offered for sale, by public auction at the office of the secretary Treasurer, in the Village of Carbon, commencing at 2 o'clock in the afternoon, on Tuesday, the 6th day of October, 1931.

Each lot will be offered subject to a reserve bid and the reservations contained in the existing certificate of Title.

Terms—Cash, on acceptance of bid. Redemption may be made by paying all arrears of taxes and costs at any time prior to being offered for sale.

Dated at Carbon, Alberta, this 4th day of August, 1931.

ALEX REID,
Secretary-Treasurer**NOTICE**

A number of 'members' of the Carbon Golf Club have not paid their 1931 dues. There are a number of small debts to clear off and there is no money in the treasury to do this. In all fairness to those who have paid their dues, could those who have enjoyed the privileges of the club all year, and who are in arrears, not send in their remittance immediately?

Please make an endeavor to do so at once.

THE CARBON CHRONICLE**Looking to the Future**

Robert Gardiner, M.L.A., president of the United Farmers of Alberta, says:—

"Looking to the future I am confident that Alberta farmers will never be satisfied by any system of marketing that is not strictly co-operative in its basis, because no other system can meet their needs.

"By patronizing Pool elevators we can speed the day when the co-operative system will be firmly established as the normal method of handling our products."
